Below you should enter your database connection details. If you are not sure about these, contact your host.
Database Name
mdwebsite
The name of the database you want to use with WordPress.
Username
root
Your database username.
Password
Your database password.
Database Host
localhost
You should be able to get this info from your web host, if localhost doesn't work.
Table Prefix
wp_
If you want to run multiple WordPress installations in a single database, change this.
